

FORM 11
SHORT/LONG TERM MEDICATION

Short Term Use of Medication (up to two weeks)

For administration of **short term** medication such as a course of antibiotics, our school requires written authority from parents/carers. This authority can be provided by completing an **Administration of Medication form**. These forms can be obtained from the School Officer or downloaded from the school's website.

Alternatively, parents/carers may complete the attached form and provide the medication to the school.

Note:

- The medication must be clearly labelled with the child's name and provided in packaging from the pharmacy or the manufacturer.
- Documentation must be signed and dated by a parent or carer and provided to the school with the medication.

Long Term Use of Medication

If you require the school to administer medication to your child for a period of more than two weeks, and if you have not already done so, you may need to complete a *Student Health Care Summary* and a *Management/Emergency Response Plan* for your child's particular health need. In most instances, this documentation will have been completed when you enrolled your child or as part of the school's process for updating student health care records. If this is not the case, please discuss with the School Officer.

Thank you for your help.
Yours sincerely

Sharon Albers-Smith
