

BUNGAREE PRIMARY SCHOOL

EXCELLENCE THROUGH EFFORT

OUR COMMITMENT TO YOU

Bungaree Primary School is committed to providing high-quality educational outcomes for each and every student.

Our school strives to provide a vibrant and supportive learning environment that will nurture each student to achieve their academic, physical, social and emotional potential.

Bungaree Primary School aspires to be a dynamic learning community characterised by:

- ▶ A vibrant and welcoming place for all
- ▶ High expectations of all school community members
- ▶ Open and respectful communication
- ▶ A place where our cultural diversity and inclusivity are celebrated
- ▶ A range of learning options, guided by the WA Curriculum and informed by the principles and values of the Curriculum Framework

A PLACE TO BELONG

At Bungaree Primary School, our top priority is ensuring that each of our students is learning in a safe, caring and nurturing environment.

We have developed an effective set of strategies to maintain a high level of student behaviour, participation and achievement. Their rights and responsibilities are respected through our expectations of staff-student engagement and a positive, proactive approach to learning. We strongly encourage all adults and children to have respect for themselves, each other, and their educational environment.

LEADERS OF LEARNING

As a proudly Independent Public School, we are privileged to have the ability to hand-select top-class educators and support staff. All members of staff are appointed with a clear expectation to deliver high-quality, engaging and motivational learning programs to students across all learning areas.

ENSURING ACHIEVEMENT

This model shows the process our school takes to ensure students reach their potential.

DIVERSE AND FLEXIBLE

We recognise and understand that, like many schools, our students and their families come from diverse backgrounds and have a range of life experiences. As an Independent Public School, we are able to adapt our curriculum to suit and respond to the individual.

Our flexible learning program recognises specific strengths, addresses particular needs and responds to preferred learning styles. We understand that all students develop at their own rate and we are committed to catering to a wide range of unique learning needs.

We are proactive and responsive, catering to each child's individual character, fostering a healthy and motivating approach that will prepare them as confident community members, both now and into the future.

OUR COLLABORATIVE APPROACH

At Bungaree Primary School, we firmly believe that parents, carers and families are by far the most important influences on a child's life.

Through encouraging regular, open and clear communication, we are committed to engaging parents as partners in their child's education. Our school promotes the active participation of parents and carers in order to achieve the highest possible outcomes for our students, and we are vested in providing a range of opportunities where this joint partnership can continue to grow.

We also recognise that our school has a role to play as a community hub and we are proactive in partnering with local stakeholders from government and non-government agencies, local businesses and community groups, to engender mutually-beneficial collaborations.

A BREADTH OF OPPORTUNITY

Our school offers an intimate and cohesive learning environment, and we also boast wide-ranging learning opportunities so our students can flourish.

Our key specialist programs of Science, The Arts and Physical Education provide a platform for all students; those who are particularly gifted and talented can realise their potential and refine their skills and knowledge in these key learning areas.

We pride ourselves on being connected within and across our school community. Our cohesive approach integrates students from Peel Language Development School (PLDS), which caters for children with a specific language impairment. Both schools are involved in a range of class-based activities, school events such as assemblies, sports carnivals and community events.

A LOVE OF LEARNING

Above all, our core aim is to build and foster a love of learning that each student will carry throughout life. We strive to do this by providing a supportive and challenging learning environment that motivates and engages children in a range of learning experiences.

We expose our students to inspiring opportunities that will nurture their intellectual, social, emotional and physical development, and our school cultivates creativity, harnesses challenges and encourages imagination to prepare students as active citizens of the world.
